

# Small Electrical heating tunnel

| Name  | Model   | Price(\$) | Quantity | General | Remark       |
|---|---------|-----------|----------|---------|--------------|
| Electrical shrink tunnel  | HF-640S | 1560      | 1        | 1560    | 220v 3P 50HZ |
| Total Amount  |         |           |          |         |              |
| Remark:<br>1. Payment: T/T 50% in advance, 50%TT before ex-work.<br>2. Shipment time :20 days since get deposit and samples of bottles & labels |         |           |          |         |              |

## 1. Introduction

The small tunnel is used to seal bottle's caps or necks by heating shrink sleeve films, or used for very small bottles' full body sleeves wrapping/labeling.

## 2. Advantages

- (1) Much smaller volume than common type electrical shrink tunnels
- (2) Easy to adjust height to suit different bottles' height by handles
- (3) Low power consumption, 8.25kw
- (4) High efficiency for bottles /caps sleeve sealing
- (5) Safety protection cover, no heating hurt to people.
- (6) No water left on bottles than steam shrink tunnel.
- (7) **Thermal protection** (heat Insulation material) inside, prevent burns, and avoid stopping working suddenly because of high temperature
- (8) 640mm long tunnel, Entrance size is customized
- (9) no need install tunnel on conveyor, just remove it if needn't.

| Item          | Models | Parameters   |
|---------------|--------|--|
| Length        |        | 0.64meters   |
| Height        |        | Adjustable to conveyor or customized                           |
| Main material |        | SS304 steel  |
| Blower powder |        | 8.25kw   |
| Application   |        | Bottle caps/necks/Lipstick bottles/or similar small containers |
